Hiring Manager
Akamai Technologies

Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer (Remote) position at Akamai Technologies. With a background in Electronics and Communication Engineering and hands-on experience in C programming on Linux, backend development, and networking fundamentals, I am excited about the opportunity to contribute to Akamai's world-class Enterprise Security Team.

In my recent projects, I have designed and implemented backend solutions using **C on Linux** and **Python**, focusing on secure communications and REST API development. My familiarity with **TCP/IP, HTTP, SSL/TLS, and DNS** protocols, gained through both academic learning and real-world projects, has equipped me to contribute effectively to Akamai's mission of protecting enterprises through Zero Trust security solutions.

Additionally, my experience with **AWS cloud services** such as EC2, RDS, and S3 has allowed me to deploy and manage scalable applications with secure networking practices. My exposure to modern tools including Docker and Git, combined with my commitment to writing efficient, clean code, makes me confident in my ability to thrive in Akamai's distributed and collaborative environment.

I am particularly drawn to Akamai's FlexBase approach, and I am eager to be part of a team that continuously pushes the boundaries of security and performance on a global scale.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to Akamai's vision.

Sincerely,
Tummapala Gopichand
